

Blood / Body Fluid (BBP) Exposure Alert

If you have a specific eye, mouth, other mucus membrane, or non-intact skin contact with blood or other infectious materials that result from the performance of your job duties, you need to be evaluated by a designated health care provider the same day.

Immediately report expected exposure to your direct supervisor and contact the Early Intervention Nurse at 1-877-742-3467. You will be given either first aid information or instructions on which designated health care provider to report to. It is critical that you tell them that you have had a suspected exposure to blood borne pathogens related to your work:

- Hilltop Medical Clinic East: 1093 Hilltop Drive, Redding, CA, (530) 221-1565, Open M-Sat. 9am-9pm, Sunday 10am-6pm.
- Hilltop Medical Center West: 2123 Eureka Way, Redding, CA, (530) 246-4629, Open M-Friday 8am-5:45pm, Sat. 9am-4:45pm, closed Sunday.
- In the event the possible exposure happens after 9:00 pm or before 8:00 am report to a hospital emergency room. It is critical that you tell them you have had a possible work related injury. If you must use the emergency room, you must notify your supervisor and Administrative Assistant the next work day. Please use designated provider whenever possible.

Always protect yourself and wear gloves and other protective equipment necessary to keep you safe before exposure happens.
