

Using PDF to TIFF Converter

The converter application has three panels. From left to right:

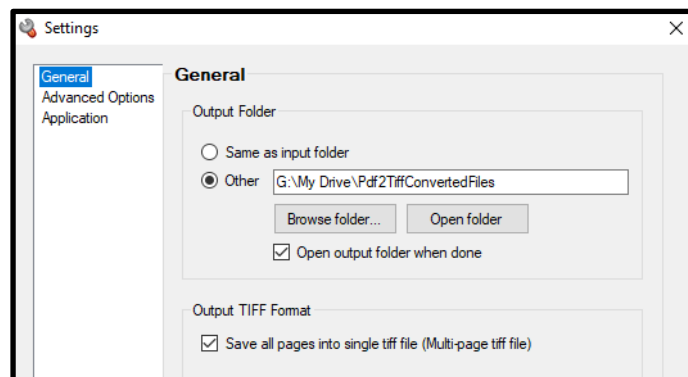

- Folder tree from your computer, including Google Drive, if you use it
- PDF files within the selected folder
- Files to be converted.

Select files from the middle and 'move' them to the third panel using the blue, to add, and the gold chevrons, to remove, the files. The double chevrons will perform the desired task for all files in the second or third panels.

Either you can use the default folder destination, or you can create your own. Do not use the same as input folder option.

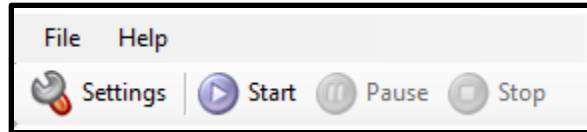

As a precaution, I always look at the settings as a double check the destination location. Most likely, you will want to save your document into a single tiff file. The below selections are perfect (for me at least).

Once I select my files to convert, they will appear on the third panel.

File Name	File Path	Status
20210118 MLK 2 hrs.pdf	G:\My Drive_MAM personal stuff\AAs\2021\20210118 MLK 2 hrs.pdf	
Absence_Affidavit_Fom_12.10.19.pdf	G:\My Drive_MAM personal stuff\AAs\2021\Absence_Affidavit_Fom_12.10.19.pdf	
Absence_Affidavit_Fom_test.pdf	G:\My Drive_MAM personal stuff\AAs\2021\Absence_Affidavit_Fom_test.pdf	

I simply select start and the magic begins

The converter will work right down the list. If the file is large, you may see the work processing in the status column. It will stop once it is complete.

File Name	File Path	Status
20210118 MLK 2 hrs.pdf	G:\My Drive_MAM personal stuff\AAs\2021\20210118 MLK 2 hrs.pdf	Success
Absence_Affidavit_Fom_12.10.19.pdf	G:\My Drive_MAM personal stuff\AAs\2021\Absence_Affidavit_Fom_12.10.19.pdf	Success
Absence_Affidavit_Fom_test.pdf	G:\My Drive_MAM personal stuff\AAs\2021\Absence_Affidavit_Fom_test.pdf	Success

In addition, if you have the box checked to open output folder when done the destination folder is open and ready for you to proceed.

If you have more files to complete, simply removed the files from the third panel, or they will be converted again, wash, rinse, and repeat.
