LEARNING RECOVERY PROGRAM

JULY 11-29, 2022

Shasta County SELPA, Dunamis Wellness, and your child's school invite your student to participate in a learning recovery program for students with an IEP. This is an educational program, the curriculum will be woven into a typical summer camp experience.

Additional supports are in place to allow all students to participate.

The program will be at Enterprise High School and based on enrollment, busing from pick-up spots around the county may be available.

Enroll by completing this online form: <https://bit.ly/SelpaSummer2022>

For questions email SELPASummer@shastcoe.org or leave a message at 530-782-2168

The SELPA's summer program during summer 2022 is an expanded and enriched program to address the impacts of school closures on students. The summer program will include supports and related services for students with disabilities to encourage participation and learning recovery for all students. These supports and services are above and beyond what students typically have access to in summer school programs. Any additional services and/or supports offered to a student with a disability are not a part of that student's IEP or Section 504 plan and are unique to summer 2022.
